

Race officer use of Sailevent to create race results entry.

Tudor sailing club will be using “sailevent” to provide a web based eTally system for our summer race series to act as the “sign-on sheet”. This is being done to avoid Covid19 problems that would exist with a paper-based system.

As a race officer you will want the entry list. To get it go to web address <https://sailevent.net/r1/tudor> and enter the PIN 123451. You will then see:-

Race officer use of Sailevent to create race results entry.

The participant tab lists those who have entered the series with the tick in the afloat column indicating those who have eTallied as going to race (i.e. signed on). Copy the sailing participants to the results book. No further action in the app is needed.
